PROFESSIONAL SUMMARY

Results-driven **MERN Stack Developer** with hands-on experience building scalable, responsive web applications. Proficient in **React.js**, **Node.js**, **Express.js**, and **MongoDB**, with strong command over RESTful API design, component architecture, and UI/UX principles. Completed internships at **Bluestock Fintech** and **Prodesk IT**, delivering production-level features. Passionate about clean code, performance optimization, and solving real-world problems.

EDUCATION

B.Tech in Computer Science	College of Engineering Roorkee	2022 – 2026
12th (PCM)	UP Board	2020 – 2021
10th	UP Board	2018 – 2019

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Axios
Backend	Node.js, Express.js, RESTful APIs
Database	MongoDB
Tools	Git, GitHub, Postman, Chrome DevTools
Concepts	REST APIs, Component Architecture, Routing, Agile/Scrum, Version Control
Soft Skills	Problem-Solving, Team Collaboration, Attention to Detail

WORK EXPERIENCE

Web Developer & Designer

Mar 2026 – Present

Velora Global Ventures

- Developed and deployed SEO-optimized, responsive websites using React.js and modern CSS frameworks, improving page load speed by optimizing assets and minimizing render-blocking resources.
- Designed intuitive UI/UX layouts and translated Figma/design concepts into pixel-perfect, functional web interfaces.
- Ensured cross-device mobile responsiveness and consistent UI across browsers.
- Collaborated with marketing and content teams in Agile sprints to implement new features.
- Identified and resolved production bugs, maintaining smooth performance of live projects.

Software Development Engineer Intern

Jun 2025 – Jul 2025

Bluestock Fintech

- Contributed to full-stack development of production-level features using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Built and tested RESTful APIs, improving data handling efficiency and optimizing response structures.
- Enhanced frontend performance by refactoring React components and eliminating unnecessary re-renders.
- Participated in Agile sprints, daily standups, and used Git/GitHub for version control.

PROJECTS

ZayKaxpress – Full-Stack Food Delivery Platform

MongoDB · Express.js · React.js · Node.js

- Engineered a full-stack food delivery web application from scratch using the MERN stack.
- Designed modular, reusable React component library for an optimized, consistent user interface.
- Implemented secure RESTful APIs with Node.js and Express.js, connected to a MongoDB database.
- Optimized React state management, reducing component re-renders and improving load performance.
